WE GUIDE ELEVATOR TRAINING FOR RELIABLE ELEVATORS

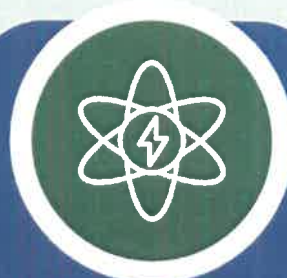

OBJECTIVES

Our aim is to fill a huge training gap in the elevator industry; with courses, training programs and online platforms to be created is to be closed. Elevator companies provide reliable elevator services to their employees by providing them with competence in elevator final checks. To increase the number of elevators and to ensure the continuity of safety conditions in elevators.

TARGET GROUPS OF THE PROJECT

Training kit, standardization course curriculum and data on safe elevators created within the scope of the project work packages Information about Safe Elevator Standardization will be published on the website to be installed in light of the pool. To increase the level of knowledge and to ensure that elevator industry employees gain competence by increasing their awareness levels. and in this context, it focuses on increasing the number of reliable elevators by increasing the number of trained employees.

WORK PACKAGES AND ACTIVITIES

The activities to be implemented in the project include creating an educational kit, presenting elevator inspection instructions as training videos and online modules, providing certified face-to-face and online courses, publishing country elevator reports, organizing seminars and focus group meetings, workshops, LTTs and TPMs. The aim of all these activities is to equip elevator industry employees with competence and increase the number of safe elevators in the sector.
